1. Background and Rationale

Livestock and agriculture remain the foundation of livelihoods in Mandera County. Over 90% of the population in Mandera County rely on agriculture, and similarly, 84% of Mandera rely on livestock production. In times of drought, livestock populations are under acute threat,¹ and livestock recovery efforts are complicated by cyclical natural disasters. In times of drought, livestock populations are under acute threat,² and livestock recovery efforts are complicated by cyclical natural disasters. The prevalence of livestock diseases, such as Contagious Bovine Pleuropneumonia (CBPP), CCPP, Peste des Petits Ruminant, and Rift Valley Fever (RVF), continue to affect the livestock sector as poor capacity and knowledge continues to hamper effective disease surveillance in Mandera County.

As such, RACIDA through its USAID funded Integrated emergency response to the triple crisis of drought, COVID-19, and desert locusts in Mandera County, Kenya (IETC) project, will work to fill the gaping gap in effective disease control by strengthening the capacities of animal health service professionals (veterinarians) and Community Disease Reporters (CDRs) to apply Participatory Disease Surveillance (PDS). The use of participatory approaches will improve our understanding of the patterns of diseases in the target populations, disease surveillance systems for early detection, rapid response, and effective control of zoonotic diseases at the community level.

2. Purpose of the TOT

- To develop Trainer's manual based on the Participatory Epidemiology 10-day introductory training guide.
- To provide training of trainers on the knowledge and practical implementation approaches of participatory disease surveillance through a 10-day training.
- Oversee a 15-day practical study as required in the Participatory Epidemiology Training Manual with focus on various livestock diseases using PE methods.
- Document the learning process.

3. Composition of Trainees

- The direct beneficiaries of the project are health service professionals (veterinarians).
- will be facilitated by the selected PENAPH certified trainers using the PE Introductory training manual.

¹ During the 2011 drought, between 40-60% of the livestock population was wiped out in Mandera County

² During the 2011 drought, between 40-60% of the livestock population was wiped out in Mandera County

4. Outputs and Deliverables

The consultant shall deliver the following:

- A training guide for Participatory Epidemiology to be used
- Review of the livestock diseases and how PE can be applied in their investigations and control for the PE
- Train 16 veterinary officers and a senior representative selected by the county livestock department
- Carry out the evaluation of the training at the end of the training.
- A final report of the training that include the following:
 - Methodology employed by the consultant;
 - List of those in attendance;
 - Report from Phase 1 (10-day training)
 - Final Report of Phase 2 (15-day field study) findings

5. Expected Methodology

A participatory, practical, and evidence-based approach will be assumed during the 10-day training period and 15-day study. Some of these approaches will include:

- Training Manual
- PowerPoint presentations
- Group work and presentation
- Case studies
- Field Work

6. Duration of Assignment

The consultant is expected to be contracted end of November 2021. Upon award of the consultancy, the consultant is expected to commence the training within a period of 27 days. RACIDA expects the consultant to carry out all the works including submission of the relevant reports within 30 days (Phase one 10 days training, Phase 2 15 days EP study findings, and remaining days for reporting) effective the day of contracting.

7. RACIDA Responsibilities

- Training facilities, and materials
- Identification of trainees
- Provision of PE introductory training manual

8. Qualifications and Experience of Consultant

The independent consultant/consultancy firm must demonstrate experience and expertise as follows:

- Hold at least a Bachelor's degree in Veterinary Medicine, Public Health or any other livestock related qualification with proven experience participatory epidemiology.
- Certification as a trainer in Participatory Epidemiology (PENAPH certification preferred).
- Proven solid experience of disease surveillance work in the ASAL areas of Kenya.
- Previous and/or current experience in similar assignment with Government of Kenya and/or NGO preferred.

- Good knowledge and experience in community-based initiatives.
- Excellent analytical, presentation and writing skills.
- Experience in qualitative data gathering and analysis.
- Ability to lead multi-disciplinary teams

9. Evaluation Criteria:

Evaluation Criteria	Sub criteria/Description	Score
Consultant Academic and Professional Qualification	<ul style="list-style-type: none"> • Hold at least a Bachelor's degree in Veterinary Medicine, Public Health or any other livestock related qualification with proven experience participatory epidemiology. • Certification as a trainer in Participatory Epidemiology (PENAPH certification preferred). 	35%
Consultant Prior Work Experience	<ul style="list-style-type: none"> • Proven solid experience of disease surveillance work in the ASAL areas of Kenya. • Previous and/or current experience in similar assignment with Government of Kenya and/or NGO preferred. • Good knowledge and experience in community-based initiatives. 	20%
